

# MODULAR CONNECTIONS, LLC

CONNECTING YOU TO THE BEST BUILDING SOLUTIONS

## EQUIPMENT / CONTROL ENCLOSURES

### PREFABRICATED HOUSINGS & ENCLOSURES

At Modular Connections, we manufacture prefabricated concrete enclosures for varied customers and projects nationwide. Our enclosures are popular for MCCs, VFDs, electrical control rooms, pump housings and filter housings. Our building solution offers cost savings, timeliness, quality and a high strength final product. Our control rooms and equipment enclosures can be floorless or include a floor with blockouts.

Our buildings carry a 150mph wind loading and level 4 bulletproof rating. Our 72,000 sqft indoor casting and construction facility ensures there are zero delays and quality is the number one priority. Pre-installed HVAC, interior finish and electrical means your facility can be installed and operational in as little as one day.

We are here to help. Give us a call for free advice, drawings and quotes on any type of enclosure you might need. You will be glad you did!
